

References for Bicycle Planning

This page provides a list of sample references for bicycle planning; it is by no means comprehensive. For a more extensive list of references that is continually updated, see <http://www.bicyclinginfo.org>. Where possible, links are provided to publishing organizations and/or online versions of the documents. Please note that department policy does not allow links to for-profit organizations, so a phone number is provided in place of a URL in these cases.

American Association of State Highway and Transportation Officials (AASHTO) *Guide for the Development of Bicycle Facilities*, AASHTO, Washington, DC, 1999.
